

# GET-A-LONG STOCK FARM

## Reflections from Get-A-Long

This fall, Get-A-Long Stock farm will have been in business for thirty years. Before we were married and owned any heifers, Shelly and I bought lucky 13 heifer calves, 12 black ones via the 1976 Superstar Sale and one token red from the very first Red Roundup. The red one was farmed out at a good friend, Jim and Shirley Good of Red Line Red Angus while the black babies went to Kadance Ranch, Roger and Kay Bowers of Montana. After the fed bill and whatever, 7 black two year olds came back to Alberta in the spring of 1978 and believe it or not were calved out by your OBI Sales Management, Rob Holowaychuk. I think it's an added service for his free time so maybe talk to him about doing the same for you. From that meager beginning, our numbers increased to about 300 mother cows, 1/2 black and 1/2 red. In December 2005, Ringstead Ranch of Millarville, Alberta and Drake Saskatchewan purchased our entire herd of black and black carrier cattle, the open heifers plus our herd bull battery which included Early Dateline, Masterplan and Traveller (an 8180 son) Thank you Rick and Deb Connes, very very much for your confidence in the Get-A-Long program and may that part of our program be as enjoyable and profitable to yourself as it indeed was for Shelly and myself.

In 1988, Get-A-Long Stock Farm was named Alberta Angus Breeder of the year, this year, 2006, we were honored with Canadian Red Angus Breeder of the year. Winning this, one is very humble but to each person that we have crossed a path since the beginning of this program, we say a sincere thank you for taking the time to show an interest in what has transpired in the last thirty, we are both charged and ready to give her hell for the next 30! The effort and work you put into a program creates the rewards you and others gather. Remember this is truly a people business, not just a cattle business!

We are very happy with our group of Hayshaker candidates for 2006 and you will notice, we don't buy a lot of outside semen for this program as we would rather own the bull and sell offspring produced by the seed bulls we gather. We are super excited about purchasing Red Bell Rock Jester at the Regina Bull Sale this spring. Our high selling cow and high selling heifer will receive two straws as an added Get-A-Long thank you!. A very exciting lot will be the Pick of our Heifer calves by September 15th. Wished we would have done it last year when it could have been a black or red contest!

In making my pre-Hayshaker tour, granted I've seen some dryer locations (Wetaskiwin for one) but one doesn't need to drive very far before you see the best crops ever plus more and more forage and pasture! We have just finished one of our better Dare to be Different bull seasons, the 17th annual Spring Classic was awesome for all concerned. Get ready for a "Hayshakin Good Time!"

Remember the most important part about the 23rd Hayshaker, just might be the party, the pie the beef the socializing and the gathering. We thank you all for your support in the past and totally look forward to the many new friends who's acquaintance we haven't made yet.

A big thank you to the Boyd and Roxie Monea family (Brock & Brett) as well as Chris Hill for all their able assistance in keeping Get-A-Long in a very favorable position.

One more thought. Do not follow where the path may lead. Go instead where there is no path and leave a trail.

Dennis & Shelly Ericson  
Phone: (780) 352-7630

## PICK OF 2006 HEIFER CALVES

Wow, this is something that we have never done before but why not because we do want you to buy the good ones from Get-A-Long. Do not follow where the path may lead. Go instead where there is no path and leave a trail. These may be the best set of heifers ever born at Get-A-Long and we are offering you the choice of any individual born in 2006. The selection must be made by the 15th of September 2006. If you would like some help, we would be more than happy to assist you as we do want you to get the right one. Once again any heifer calf is available from Get-A-Long from our leading sires Linebacker, Mercedes, Last Call, Hobo 1961, Matt Dillon, Storm, Pasquale, Rambler, Beyond, Basin Max, Resurrection and there even is a Karwick daughter, just for you Bryan (she is very good). We would like to retain a future flush on this heifer picked and if you so desire, we would be more than happy to keep the heifer and run her of a share basis. You decide, come and see the sales offering and calves prior to August 12th. or afterwards as I am already excited. How many breeders would let you do this!

This year, our group of bred heifers, all red, are the evenest ever with an age range of about 7 weeks and once again we have tried to include a cross section of the Get A Long herd bull battery with 8 different sires represented in our group of ten. Our numbers of heifers this year was cut back because a group of twenty were sold to Mile High Land and Cattle Co of Red Deer plus our 10 in the 17th annual Spring Classic were very well received scattering to BC, Alberta, Saskatchewan and Ontario for an excellent average of \$2825. When we sold Rainmaker in the 2003 All A.I.'d sale to Diamond D for \$20,500, Red Bar M Rainmaker 82M (Deano) was his best son that we could find to fill the void, note his dam was one heck of a \$9600 purchase by Bar M (first calf) where dam was Red Bonny 7468 (Brylor feature cow in 2004 at 14000 (1/2 interest) to Darcy McGhan. We have only released two daughters of Deano to date to Maple Acres and Dale Weins. He was injured this spring in a bull fight and came out second

RED GET-A-LONG PENNY 5140

best hence this commodity will be very limited. The dam of this heifer was purchased from the North Peace Dispersal in 2003 because her maternal sister is at Get A Long, Red North Peace 19G with Elite cow status. The first daughter of Red North Peace 107K sold thru the Dispersal to Bar M in Manitoba while the second was the very unique Mario daughter that sold in the 2005 Spring Classic to Six Mile in Saskatchewan at \$2300. The dam of Penny 5140 will remain at Get A Long for a long time as she is moderate, easy doing and gets the job done!

I was asked the other day by a fellow Angus Breeder from Saskatchewan when we were towing the sales heifers, how can you keep selling all the good replacement heifers at Get A Long year after year in the Hayshaker, Red Roundup or Spring Classic and still maintain the herd status within the industry that you have. The answer is very simple. we do try to purchase many of the daughters or granddaughters of the individuals that we sell at the many sales we attend. No cow bred heifer or heifer calf is untouchable at Get A Long and the only females that are not priced are Shelly and our border collie, Ellie. Shelly might be negotiable with the right offer some days! This heifer is a maternal sister to last years high seller at Hayshaker 2005 at \$6400 to Y Coulee, from Frenchman Butte, Saskatchewan. They are also our partners in the new \$24900 outcross bred bull, Jester from Regina Bull Sale plus Hustle and Resurrection. That particular heifer was a Linebacker daughter whose paternal brother, Place Kick, was the pick of the 2005 Dare to be Different Bull Pen, The feature cow, we have in this event by

Linesman 103 is a full transplant brother to the \$60000 Linebacker 109. He teamed up with Little Joe (Century son) and sire of the \$11500 heifer in Hayshaker XX1 plus Linebacker to win their class at the 2002 Canadian Bull Congress before being sold privately there the Dare to be Different Bull Pen to North Peace in Fort St. John, BC. When Ed Gardiner dispersed his herd in 2003, it was a buyer's market with an excellent herd bull battery offered, Linesman and Resurrection were added to the Get A Long Herd Bull Battery. Linesman's lease on life was, when your brother sold for \$60000 as became famous, sometimes you try harder! There Linesman's daughters sold this spring for an excellent average of \$2633 to Tom Arnell, Lakeview and Papa Jack. This year's Hayshaker offering has only Duchess 5125 representing his handiwork. The dam of this heifer is one of the Get A Long favorites! Not only did she get purchased as a heifer calf from

Angus Pride 1999, she came from really great people, the Gibson's of Six Mile. She was sired by the first bull that Get A Long sold for any amount of money in 1979 privately before we even had a Dare to be Different Bull Pen. Ken Fraser didn't think the name Red Licorice was masculine enough for his new herd sire, he wanted to change it to Challenger. We refused as we wanted the bull to be an individual! Can you imagine that we were young and stupid enough, not to give in to a buyers wishes and just do it! Red Licorice might never have become a household or barnyard name if he had not gone to Six Mile back in the fall of 1979 and become an impact herd bull!

Did you know that the first full calf picked from the 2006 Dare to be Different Bull Pen was named Red Get A Long Rare 523 to the Kyle family, Kenray Red Angus at Redvers, Sask, the day after Red Roundup this year, the first pick was on June 21 by Y Coulee. Kenray are one of your hosts on the Canadian Red Angus tour this summer, the week after the Hayshaker. See you all there as they are a great time for another social gathering a lot like August 12th. Last Call was sold to Todd Angus in Quebec in 2002. His last show was the 2003 Toronto Royal where he was named Reserve Senior Champion Bull behind a Battle Cry son. Incidentally that same day, Red Gold Bar Mercedes was Reserve Grand after winning it all the year previous as a calf. Anyway, Last Call came back to Alberta, bred cows and was our display bull at the Canadian Bull Congress this spring. His first daughter for Get A Long was the high selling heifer calf at Hayshaker last year selling for \$3000 to Namakwaland, the Gerbers of Vermilion, Alberta while his second daughter sold this spring in the Spring Classic for \$3300 to R&S Reds (Roger Sisler & Sandra Vos) Brantford, Ontario. This heifer was a member of our Red Pen of Fine at Camrose this spring as well. In the 2003 Hayshaker the granddam of this heifer was truly the Highlight

selling for \$10500 to Swan Creek and Bogle Pass while her Century baby brought \$3750 that same day. Because we had this Gold Medal daughter of Highlight 14H to act as her replacement, she was released for that particular sale. I've always said one can never ever have enough direct Patriot 16 daughters in your program!

The calf crop sired by Red Gold Bar Mercedes 116M this year is awesome and David, that is something I don't say very often. His sons this year in the Dare to be Different Bull Pen made up 20% and averaged a solid \$2750 out of the yard. They were very fleshing, big nuts with great dispositions. In my opinion although somewhat prejudiced, he is indeed the first breeding son of the \$59000 King. There were many reasons why we purchased him at Agribition in 2003 jointly with Bar 5 Simmental and Angus. Firstly, we like the muscle in his sire, King, enough to be the contending bidder (3 other partners in Alberta, Saskatchewan, and Manitoba) we

RED GET-A-LONG PRIDETA 561

felt his dam was the most productive cow at the Gold Bar, \$14000 last fall having produced 3 other herdbulls, all from different sires, plus we felt he was a very legitimate contender to follow Century into the championship circle. He never accomplished that first and had to settle for a Grand and a Reserve at the Toronto Royal in 2002 and 2003 but has indeed become a true king in the breeding pasture as he looks like a stud horse out there patrolling his group of

cows. Perhaps the pick of the heifer calves would be a Mercedes as there are some true contenders. This heifer could have become a Red Roundup contender but we flipped a coin and her paternal sister goes instead. This would be our second Mercedes daughter released with the first selling in the Spring Classic to Maple Acres. Wayne and Margery Glasier, for \$2200 maybe the best buy in that sale. The dam has an awful good Hobo 1961 daughter at foot this year while the granddam, an own daughter of Expo 603, one of Get A Long's top five bulls raised in 30 years, was a former donor cow and the dam of Mega Force. This heifer will have many friends, get ready!

RED GET-A-LONG CARMELLA 553

It is very interesting to note that the Mercedes heifer we saved for the Red Roundup is also a Carmella being from the last daughter of our original Carmella purchase, Red Line Carmella 70N. She would be the next cow just off this pedigree tribulation coming there the Red Line Record Dispersal in 1984 being sired by Patriot 16 himself and costing \$3500 twenty two years ago. She paid for herself many times over and had the distinction of being the highest placing Red individual in the last World

Angus Forum in Edmonton under

Judge Holowaychuck, that when she stood 3rd in class in a very predominant black event. We've come a long way baby as the black cow that all of our Ellies stem from today stood eighth in her class as a two year old. The dam was sired by Carm - Ex 12H, our pick of the Exclusive 454 sons at Royal Valley in 1999, having saw service at Get A Long and Brox for two years and then retiring at Grimshaw at Misty Valley Red Angus. The sire, Resurrection at Misty Valley Red Angus. The sire Resurrection 229 was the highlight of Chopper K in 2003 when I purchased him for North Peace at \$11400. When they dispersed that fall, he was purchased by Get A Long and Brox where he saw major heifer duties in 2004. Half interest in him was then sold to Y

Whatever Angus sale we attend across Canada, we are always a potential customer, number one we are always looking for new herd bull potentials even the day after we bought last one, number two, a good female from the right cow family is very hard to pass up as was the case when we bought the sam of this heifer Red Kenny Marie 009K in the Angus Pride Sale in 2001. Did you know that the dam of Red Gold-Bar King came from this same herd a four years previous. Stop and see their now herd sire Red Get A Long Rare 523 sired by Last Call from a Sandy Bar Wonderer sam (black red carrier dam from who is now at Ringstead Ranch). Make My Day, Hobo 1961 and Flying K Chief 7U plus a minus birth EPD and good people were pretty darn good reasons for buy her in the first place. Bow Ridge Angus, the Bowies bought her last daughter in 2004 as a potential 4-H heifer Linebacker continues to get the job done as this year in the Spring

RED GET-A-LONG LASS 516

Classic, a daughter topped the open heifers at \$4200 to Tom Arnett and Vikse Family Farm, last year a daughter sold to Walnut Grove in Michigan, USA for \$7300 to Swan Creek. Mile High Land and Cattle Co bought another Linebacker from Brox in Red Roundup 2005 for \$5300 to be their foundation cow in a new program that just added 20 more heifers from Brox and 20 more from Get A Long this spring hence they are very serious about the future of this business. Linebacker has left an impact and will continue to keep up the good work as his mother was a true breeding piece.

This heifer probably should have sold in the 17th annual Angus Spring Classic Sale held in the end of March each year as that is where we put all of our show heifers into. She is owned jointly by the Monea family and the Ericsons and as she wintered at Boyds place, I completely forgot about her when I put our show cattle together for that event. She would have gave the high seller, also a Linebacker, a pretty good run for top heifer if she would have sold 4 months previous. Her full sister was slated for Red Roundup last year and she lost her calf prior to that sale hence did not make an appearance. Brox Stock Farm sold a linebacker for \$5300, we sold one for \$7300, the best one was purchased from the Sarlson family at the Spring Classic 2001. Since then, they have purchased a Basin Max son of Fayette 8K in 2004 called Night Hawk 12N, that is one stout made moderate breeding machine. (I liked from when he sold, I like him better today after seeing a set of babies). Incidentally the first bull calf sold from all the babies was sired by Basin Max from Linebackers full sister, while the second one sold also on the 21st of June (the longest day is better for viewing) was a Linebacker from a Kargo dam. Remember, first come first serviced at Get A Long as every day is Bull Sale Day. The dam is a granddaughter of Red Glacier Logan and she does come highly recommended. Remember all these heifers are mated to Red Brylor SDL Pasquale. To quote Bryan Mackenzie, "From a genetic standpoint , Pasquale is the most exciting addition to his semen catalogue." Rambler 1000, a two year old New Trend from a two year old Hobo plus partners like Abraham and Brylor, it doesn't get any better.

We have been totally happy with the results of mating Red Get-A-Long Last Call 1171 to a cross section of Get-A-Long and Brox brood cows. Character is something that many cattle lack and it is really one of the very important traits that many overlook in cattle selection. Last Call in our opinion is the best Grub Steak son in the industry while Grub Steak is the best Prime Rib son that we have produced. Grub Steak was sold as a yearling to Diamond River at Rycroft, Ab. in 1998. He was named Supreme Champion over all breeds in 1999 in Dawson Creek. When he sold in the Diamond River Dispersal in the fall of 1999 he was repurchased by Get-A-Long and 2 hours later sold to Pretty View Angus of Canora, Sk. for 1/2 Interest. He went on to be named Grand Champion at Lloydminster that fall plus winning his class at Agribition as well, he teamed up with the \$30000 Gold Bar Debbie plus Prime Time from Triple V to win the coveted Get of Sire award at Regina. Note Last Call's dam is Mrs Young 4213, the dam of Matt Dillon as well as Powder, who is being used at Get-A-Long this year. Great bulls do need great mothers and for many years this was our number one red cow having produced a \$11400 daughter to Ringstead Ranch that has been a very successful donor female in their program. The dam of this heifer is also in Hayshaker 23 because of her sweet Resurrection heifer calf. We will talk about her pedigree in her footnotes.

SERVICE: Exposed to Red Brylor SDL Pasquale 213 from April 27 to July 4.

The cow families that most breeders associate Get A Long with are the Soapys, the Mrs Youngs, the Ellies as well as the Carmellas. If the individuals that start the family are indeed superior, then the family name is highly saleable, plus very important in your cattle selection criteria. This has always been of major importance at Get A Long because good individuals with out a pedigree do not have near the value of others. Sometimes they cost more because of the genetics and the way they have been stacked. This heifer is a grand daughter of none other than Gold Medal who was owned jointly with BN Ranches at Boyle, Alberta. It is interesting to note that many of our top bulls sell to outstanding commercial herds that appreciate the effort involved in trying to produce them. Did you know that Linebacker was priced at \$10000 to a commercial man and his selection was Little Joe, our top century son that year. Anyway, Gold Medal produced a \$11400 daughter to Ringstead Ranch at Red Roundup 2001 that was also

RED GET-A-LONG MRS YOUNG 501

Mrs Young from the same lineage as this, our oldest heifer. The dam of these heifers were sold to Deep Creek in Hayshaker 1999 and he was the coupon he carried as well as the granddam was one of the original Deep Creek purchases as a heifer calf in 1998 when that very good herd was started by Gar and Marg Garton of Telkwa, BC. This heifer was the result of purchasing her mother from the Yellow Head Sale in Prince George, BC in 2004 with her daughter selling to Nine Mile Angus at the same event. If you don't already own a Mrs Young, maybe it is time to start!

SERVICE: A.I. on May 2 to Red Get-A-Long Gold Medal 7106.  
Exposed from May 26 to July 4 to Red Gold-Bar Mercedes K 116M.

It is never tough selecting our bred heifers for a Hayshaker sale, because we simply include all the power and would gladly trade any Hayshaker candidate for any Get-A-Long heifer solely owned left at home. We do not sell a heifer in this sale series that we are not interested in maybe repurchasing their daughters or granddaughters down the road. It all sums up to the cow families that make up our cow herd that makes this possible. When we select our cows for this event, the heifer calf gathers the most attention, then age, udder and consistent production of the cow and lastly feet play a major part of our selection. This selection is usually done the middle of June with cows brought home the first of July. Hence all cows are bred to herd bulls for many reasons, hence in this selection group of four, we didn't have a single one bred to the new total outcross, \$24,900 Red Bell Rock Jester. He is very unique pedigree wise as he could be bred to any Red Angus cow in Canada because the genetics are very versatile and anyway two straws of semen by Jester (he is not at the time) go to our selling cow and bred heifer buyers for a thank you bonus from Get-A-Long. This four year old is one heck of a Rainmaker daughter with her maternal sister selling as a bred heifer (Joanna 5133) plus another maternal sister topped Hayshaker last year at \$6400 to Y Coulee! Her Mercedes baby is one of our top calves at Get-A-Long hence buy her and forget about the Pick of the Herd!

SERVICE: A.I. on May 2 to Red BJR Hobo 1961. Exposed from May 26 to July 4 to Red Gold-Bar Mercedes K 116M.

Red BJR Rambler 5162, a son of the immortal Red FCC Rambo 502, plus being a paternal brother to Linebacker and Linesman, would be the main ingredient that made the Boot Jack Dispersal in Montana a few years ago, a very memorable event. He would also be the sire of Red Crescent Creek Rambler from the \$18,500 Annie transplant cow, now owned by Double Bar D and Snowflake that Olynks sold in their very special sale last fall, making him a paternal brother to Red Mac Tailor Made 7J. The sire of this cow, Tailor Made, was the talk of the 2000 bull season, selling for \$22,000 to Popular Grove Red Angus (Blaine and Sandy Meyer) We thought enough of the bull, we bought one of the first packages of semen sold and then sold the first heifer mated to him at Red Roundup 2000 for \$6500 to SDL with the resulting bull calf selling through the Brylor Bull Sale in 2002 for \$5000 to the Penner family of Grassy Lake. The dam of this cow was one of our choices when the Camrose Colony dispersed their herd in 1999. One would have to appreciate what I thought of the cow as she was twelve years of age plus being bred Simmental when she was purchased by Get-A-Long. This would be her first daughter born at Wetaskiwin. You will love her Resurrection baby born the end of February and you will also note that her yearling daughter by Last Call (Missie 509) also made the Hayshaker sort and is catalogued! Note the A.I. service here and hope for a bull calf which was why she was mated Hobo, not Jester.

SERVICE: A.I. on April 18 to Red Gold-Bar Mercedes K 116M.  
 Exposed from May 26 to July 4 to Red Gold-Bar Mercedes K 116M.

When Doug and Delarie Schneider of Diamond D had a sale, one made a point of attending for the two most important reasons. Number 1, you liked the cattle! Number 2, you liked the people! This business isn't really about cattle anyway, it's a people business whose word and guarantees means something! This cow was bought as a bred heifer in 2002 also for two reasons: the dam of the sire came from Get-A-Long via the Alberta Superstar Sale in 1994 after her and her dam, Gilda 248 had just won the two year old class in the Canadian National Red Angus Show. The second reason was that I remembered Royal Valley bought the high seller in the 1992 Mackenzie Bros Sale, she being Red MEM Dyna Bayberry 78A, this cow's grandmother. If I wouldn't have really thought a lot of her as an individual back then, then Bayberry 78A wouldn't have rung a bell. Her last year's daughter by Linebacker was one of the first picked in the group of twenty selected by Mile High Land and Cattle Co. She could have made this group of Hayshaker heifers as she did have some added power! The sire of this heifer calf as well as the next are both sired by Red T-K Beyond 306. He is a grandson of Red Blaze V415 from a Bold Edition cow who we feel is one of the top individuals in the Dorrance herd. Beyond is co-owned with Spring Creek Colony at Walsh, Alberta as well as Brox Stock Farm. One will hear more about this sire as he will see heavy service in 2007 at Wetaskiwin with a plan in mind.

Pedigree tabulations are made up of a lot of individual animals but it is when they start becoming stacked with superior individuals, one needs to start paying attention. Hustle, the sire of this cow, was indeed the pick of the Dare to be Different bull pen when selected by Y Coulee in 1999. His sire, Prime Rib, I truly believe, he was the best breeding son of his sire, Patriot 16. Prime Rib 411's dam was probably one of the extreme top daughters of his sire, Sam's Prospector 133Z. Hustle's dam Icecap 1F would still be my pick of the Brox cowherd. Her sire, Bogart, best Red Angus ambassador ever used used by Get-A-Long and Canadian Red Angus bull of the year in 1994. On the dam's side, Red Royal Braveheart, high selling bull in Royal Valley's 1996 Bull Sale at \$9200 and definitely lost before his time. If one was to ask the upper management of JB Reds who his favorite cow is, it might just be a Braveheart daughter. The sire of the granddam, a former donor cow at Get-A-Long is Red Get-A-Long 402, by Patriot 16 and a full brother to Red Get-A-Long Diamond (\$10,000 to Leachman Cattle Co.) and Red Get-A-Long Sapphire 404, the full siblings produced by our original cow: Red Miss Valley Soapy 18H. If one could write a strong maternal pedigree, tell me where the weak links are in this one. Twin Linebacker daughters born in 2004 will fill the void left by this brood matron. She also has a Beyond heifer who's first daughter sold last year at \$2300 to Moose Creek and Brox sold another in the Spring Classic this year to Al Shelton of Elenton, Ontario for \$2450. This might not be our high selling cow but whatever she costs, I will guarantee the investment very very sound!

Sire of the Embryos: Red BCAR Wildcard

With all the heat we have had this summer we are offering up some frozen germplasm that is certain to get you excited. Wildcard was the \$30,000 outcross bull purchased with Sooline Cattle Co but was lost a week into his first breeding season, damn helicopters! To enhance the unique genetics we flushed a New Trend/Lassie 18T to Wildcard to broaden the gene pool. By the way these Wildcard calves look, this would be a good way to get in on some outcross genetics. The donor cow was a \$10,000 1/2 interest feature heifer in our 2003 bred heifer sale, with Sooline being the successful bidder edging out Dennis and company. Co-owned with Sooline Cattle Co.

Each lot consists of 3 embryos. Guaranteeing one pregnancy if done by accredited technician. FOB - place of storage

Sire of the Embryos: Red Minburn Windy 5178

We were very fortunate to acquire Red Ron's Missie 15F privately. She has a perfect udder with very good teat placement, excellent feet and structure you would want in all of your cattle. She has had 5 bull calves, 4 to commercial herds and 1 bull; Red KBJ Rainmaker 963N which we have used heavily in our herd. The sire to the embryo lots is our new herdsire Red Minburn Windy 5178. He has turned heads from all visitors here and we will continue to feature him in our herd.

Sire of the Embryos: Red Minburn Windy 5178

Red HIPS Rebello 4N was our latest purchase to enhance our Red program at KBJ. She has become an instant Donor Cow and why not? We purchased her thru the coveted Red Round-Up Sale 2005 from Darren and Stacey Hipkin. She sold her first progeny, a Branded Beef heifer calf to M&B Angus from Fort Assiniboine, Ab. that same day in Red Deer, Ab. What a heifer she was and is. This year we have a Perks Advance Bull calf that we share with the Hipkins and he is flat outstanding. The sire of these embryos lots is again, Red Minburn Windy 5178, our new outcross bull from the Warrilows. Come and see him sale day, Jim or Barry will be glad to take you for a walk.
