A flat outstanding pair here folks! A direct KBJ Rouge 203H daughter with a FRL Alberda Traveler 9P daughter at side, u can't ask for a better pair. The Traveler bull we purchased from Forsyth Ranch in Herbert, SK for his great pedigree and he has left us set of babies to die for. A daughter sold to George Winter. Thanks George for your belief in our program. The dam of 41M was purchased from the Englot Dispersal Sale and she has 3 daughters in production, 41M, one in herd and 1 to Reid Mills Angus in Ontario.

Another great opportunity with the unique mating of KBJ 133M and the \$30,000 Red BCAR Wildcard we purchased with Soo Line and then lost due to a freak helicopter accident. The Wildcard progeny have been very hot in the past years and will continue to be as he was an outcross bull that has many people watching his progeny every move. KBJ 133M sold to Soo Line for \$10,000 Half Interest and continues to leave her mark on the industry just like her momma Lassie 18T. The B Lot, again consists of KBJ 133M \* Marias 548, a bull who needs no introduction to the industry. Roger found some semen and we decide to mate to her as she might be the best 18T daughter to date. A very rare opportunity here!

Co-owned with Soo Line Cattle Co.

# EVERBLACK ANGUS

Another year and another fun filled Hayshaker Sale coming up. In fact that could be our motto. Where you get to bid on the good ones and have fun doing it. Enough of that. 2007 has been a good year; lots of grass and bull sales have been just fine. It is great to be in the Angus business.

Again this year we are bringing you a select set of bred heifers. Sound, functional, feminine and bred to a good young herdsire, Lookout Pacer 48R.

So take a summer afternoon off, evaluate the cattle, and enjoy our hospitality. See you there.

Bought in dam out of the Back In Black With A Red Flair Sale, right from the top end. We have tried to gather up as many Masterplan 007 daughters as sales management would allow us. They make terrific females, good uddered and easy doing, but they are pricey. The Quantum 71N bull worked very well for us siring low birth weight cattle with good performance.

A feminine, moderate framed Max daughter. Geis Maximum 152N was the \$15,000 top selling bull at the Geis Bull Sale the day we bought him. He has worked well for us and we are still using him heavily. Atalanta 36N is just coming into her prime and is out of a great cow family. The granddam 52K has a son working at Minburn Angus, a son to PFRA and 3 daughters in herd.

A stout, powerful heifer out of our good breeding Drylander bull. Drylander again had the top selling sire group at our Annual Bull Sale. His daughters are making really useful females; good uddered and easy fleshing. The dam is a Justamere cow that has produced very well for us. The old 186Z cow was a feature donor cow at Justamere.

Another good Drylander heifer from a new cow family for just about anyone. The dam 136M is an Executive 10D daughter. We have a large number of these 10D daughters in our herd and they are no nonsense, hard working mommas. A sister to 21S sold in last year's sale to Tom Arnett and The Vikse Family Farm at top dollar.

If you want them moderate framed and easy fleshing take a look at this sweetheart. We purchased the Drylander bull because of his ease of fleshing and structural soundness. It is heifers like this that show he has worked. The dam 152D was purchased out of Hayshaker 1995 and she is sure a good example hoe these Hayshaker cattle work. She has put 5 bulls thru our bull sale, all at the top end, a daughter to Jordan Herrod at Meadow Lake and another daughter in herd. The old Lancer 60U bull was very dominant in his day; he is the guy that got the Lancer bull rolling.

A nice Max heifer here from the Annie family that worked so well for us. Several brothers thru our bull sale, a sister thru Haysmaker 2005 to the Chase's at Waveny Angus. When you see Masterplan in a pedigree think hard working, good milking, and super uddered females. We have not talked about the service to all of our heifers. We purchased Lookout Pacer 48R from the Bjorklunds at Lookout Angus because of his muscle expression, structural correctness and light BW of 78lbs. Also we really like his pedigree being sire by Roy's excellent breeding Pacesetter 258M who goes back to the famous 42B bull. On the dam side is the \$24,000 Geronimo 42L bull. We used Pacer 48R last year very successfully on heifers and trust me you will like the calves.

Our only Main Event heifer in the sale, almost an end of March heifer. 71N was the top selling bull at Minburn's Bull Sale, an ET calf out of their top producing 17E cow and the old Main Event 6H bull that sired numerous stock bulls spread around the country. The dam was purchased from the Partingtons at Country Lane and goes back to Archie's foundation Lady Ann cow, family that Early Sunset made famous. A very attractive and feminine young heifer.
